

Time for your screening mammogram?

Who it's for

- Women 40 and older – every 1-2 years
- Earlier or more often with a family history or other risk factors – ask your provider

Why it matters

- Finds changes years before they can be felt
- Early detection means more treatment options

What to expect/bring

- About 15-20 minutes, in and out
- Brief compression, a few images per side
- Current identification and insurance card

Day-of tips

Skip deodorant, lotion, and powder. Wear a two-piece outfit. Mention any breast changes to your technologist.
